TURF-COTE™

GREEN TURF COLORANT

**COST EFFECTIVE-LONG LASTING-MAINTENANCE FREE
NO TRANSITION PROBLEMS**

TURF-COTE™ colorant is a 100% acrylic water based product. Provides a cost effective means of maintaining vibrant green turf throughout the year. Especially useful during fall and winter dormancy. Its “*SPRAY and PLAY™*” formula allows same day play after application.

Golf course and sports field overseeding is expensive and requires continuous maintenance. *TURF-COTE™* provides the same excellent color at a fraction of the cost and with no maintenance. The added benefit is the elimination of overseeding transition problems.

TURF-COTE™ has been engineered to last an entire season with only one application. And has been designed to withstand heavy traffic and play. However, two or three applications at lower rates are used to affect certain transition colorings.

TURF-COTE™ is being applied on golf courses, professional and college football fields, high school athletic fields, baseball fields, and lawns. Also used in hydroseeding.

TURF-COTE™ is non-hazardous and will not harm humans, animals, plants, or fish. The product is non-combustible and has a shelf life of 1 year. Once allowed to dry, it will remain on the grass blades and will not stain uniforms.

Home lawns and commercial landscapes that are browning due to heat and drought conditions can be transformed into a beautiful green overnight.

Bermuda grass green and bluegrass green are the standard colors. However, it can be supplied in a variety of green hues to match a specific turf type.

Follow label instructions for mixing and applying.

Available in 1 Gallon, 2.5 Gallon and 5-Gallon Jugs. Also available in 55 Gallon Drums and 250 Gallon Totes.
